## VACUUM MEASUREMENT AND CONTROL

## HOW TO MEASURE YOUR VACUUM LEVEL?

### ACTIVE GAUGES

Active gauges are a complete self-contained head and driver electronics in a compact unit.

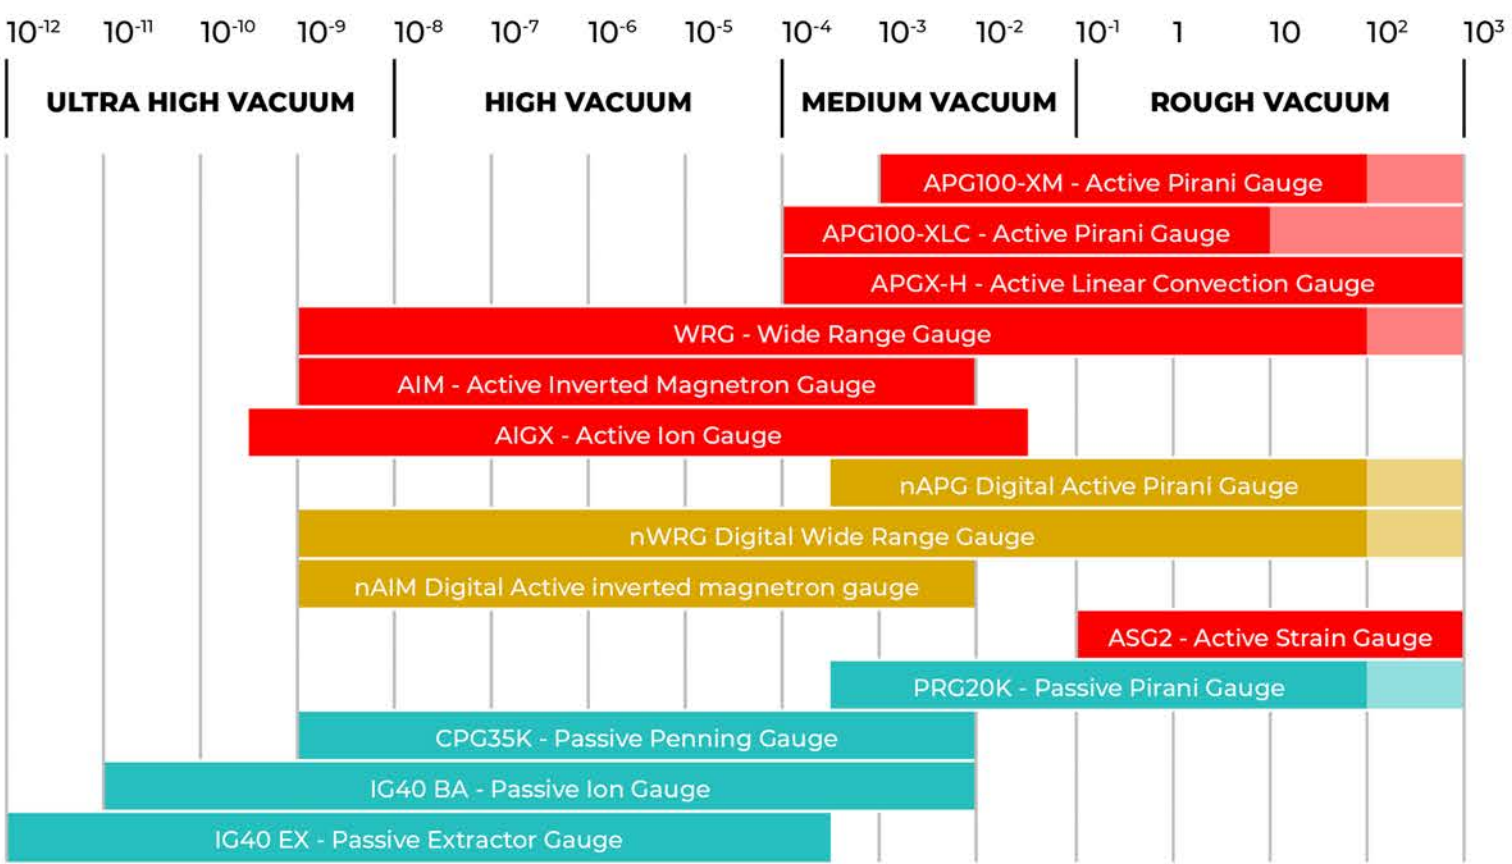

### DIGITAL GAUGES

Digital gauges are similar to Active in that they are self-contained including driving electronics, however they take this one step further and eliminate the need for a separate controller.

### PASSIVE GAUGES

Passive gauges completely separate the measuring part from the driver electronics.

### TIC CONTROLLER

The TIC Instrument Controller offers comprehensive control and display of up to 6 compatible Edwards gauges.

### PASSIVE GAUGE CONTROLLERS

Edwards PGC201 controller covers the pressure range between 10<sup>-9</sup> and 1000 mbar by combining two measurement principles from the PRG and CPG gauges.
